Step-by-Step Guide

Step 1: Clone the GitHub Repository

To create a folder and link it to the GitHub repository, follow these steps:

1. Open **Git Bash** or **Command Prompt** on your system.

2. Navigate to the directory where you want to create the folder:

    cd path/to/your/directory

3. Clone the repository using the following command:

    https://github.com/avaneeshrajd/2302031800004.git

This will create a folder named goutam-905 containing the repository files.

Step 2: Create the "Assignment1" Folder

1. Change directory to the cloned repository:

    cd 2302031800004

2. Create a new folder named **Assignment 01**:

    mkdir Assignment 01

3. Move into the **Assignment 01** folder:

    cd Assignment 01

4. Add the necessary files for the assignment inside this folder.

Step 3: Push the Changes to GitHub

Once you have added the necessary files, follow these steps to push them to the repository:

1. Navigate to the repository root if not already there:

    cd .

2. Add the new folder to Git tracking:

    git add Assignment 01/

3. Commit the changes:

    git commit -m "Added Assignment 01 folder"

4. Push the changes to GitHub:

git push origin main

(Replace main with the correct branch name if needed.)

Step 4: Verify on GitHub

1. Go to https://github.com/avaneeshrajd/2302031800004.git

2. Check if the **Assignment 01** folder appears in the repository.
